PRE-BUY PLAN

Protect yourself from winter price increases with our Pre-Buy program that ensures a stable, affordable price for the upcoming heating season. We will determine your expected usage for the 2021–2022 heating season and purchase winter contracts to guarantee these gallons will be available at the determined pre-buy price.

You'll make one payment at the beginning of the program for the gallons you wish to protect thru April 30, 2022 and tune out the worries of energy price increases during the always unpredictable New England winter.

Spicer Gas

PRICE CAP CLUB

Further protect yourself from energy price moves by joining our Price Cap Club. Membership in the club allows you to benefit from your pre-bought, fixed price in a rising market, as well as a downside benefit in a falling market. As a pre-buy member, for an additional \$275.00, you will receive the lesser of the fixed price or time-of-delivery market rate. Here's how it works: upon enrollment, a snap-shot is taken of the weekly wholesale cost of propane and then compared to the cost of propane at time of delivery. If the cost at time of delivery is less, you will receive a lower price by the difference of the two.

Spicer Gas

LEVEL PAY PLAN

We know the challenges of high winter energy costs all too well, and therefore developed a level pay plan that spreads these winter costs over a 10-month period beginning July 2021. We will determine your expected usage for the upcoming 2021–2022 heating season and calculate your payments by the market rate. You'll make 10 monthly payments due the 20th of each month and take the sting out of winter cash requirements. The final payment is due April 2022. This program does not fix the price per gallon. You will be charged the time-of-delivery market rate.
